

Notes and references of the 2026 CIMPA School

Lucas Cardoso

Abstract

This notes refer to the two weeks course of the 2026 CIMPA School, held in Santiago Chile. It contains aspects of lattice-, code-, isogeny-, multivariate-, and MPCitH-based cryptography.

- 1 Introduction**
- 2 Code-based cryptography**
- 3 Isogeny-based cryptography**
- 4 Lattice-based cryptography**
- 5 MPCitH-based cryptography**
- 6 Multivariate-based cryptography**
- 7 Conclusion**
